

The game changer solution

Lithion
Lithium-ion battery recycling

NAATBatt International
2019 Annual Meeting and Conference
Member Update Presentations
Presented by Benoit Couture, president
Lithion Recycling Inc.

**Spent LIBs
are resources,
not waste**

Key points of the Lithion process:

1

Can handle all types of lithium-ion batteries;

4

Valorizes 95% of the battery components;

2

Profitable, even without tipping fee *;

5

Safely handles charged batteries without manual dismantling;

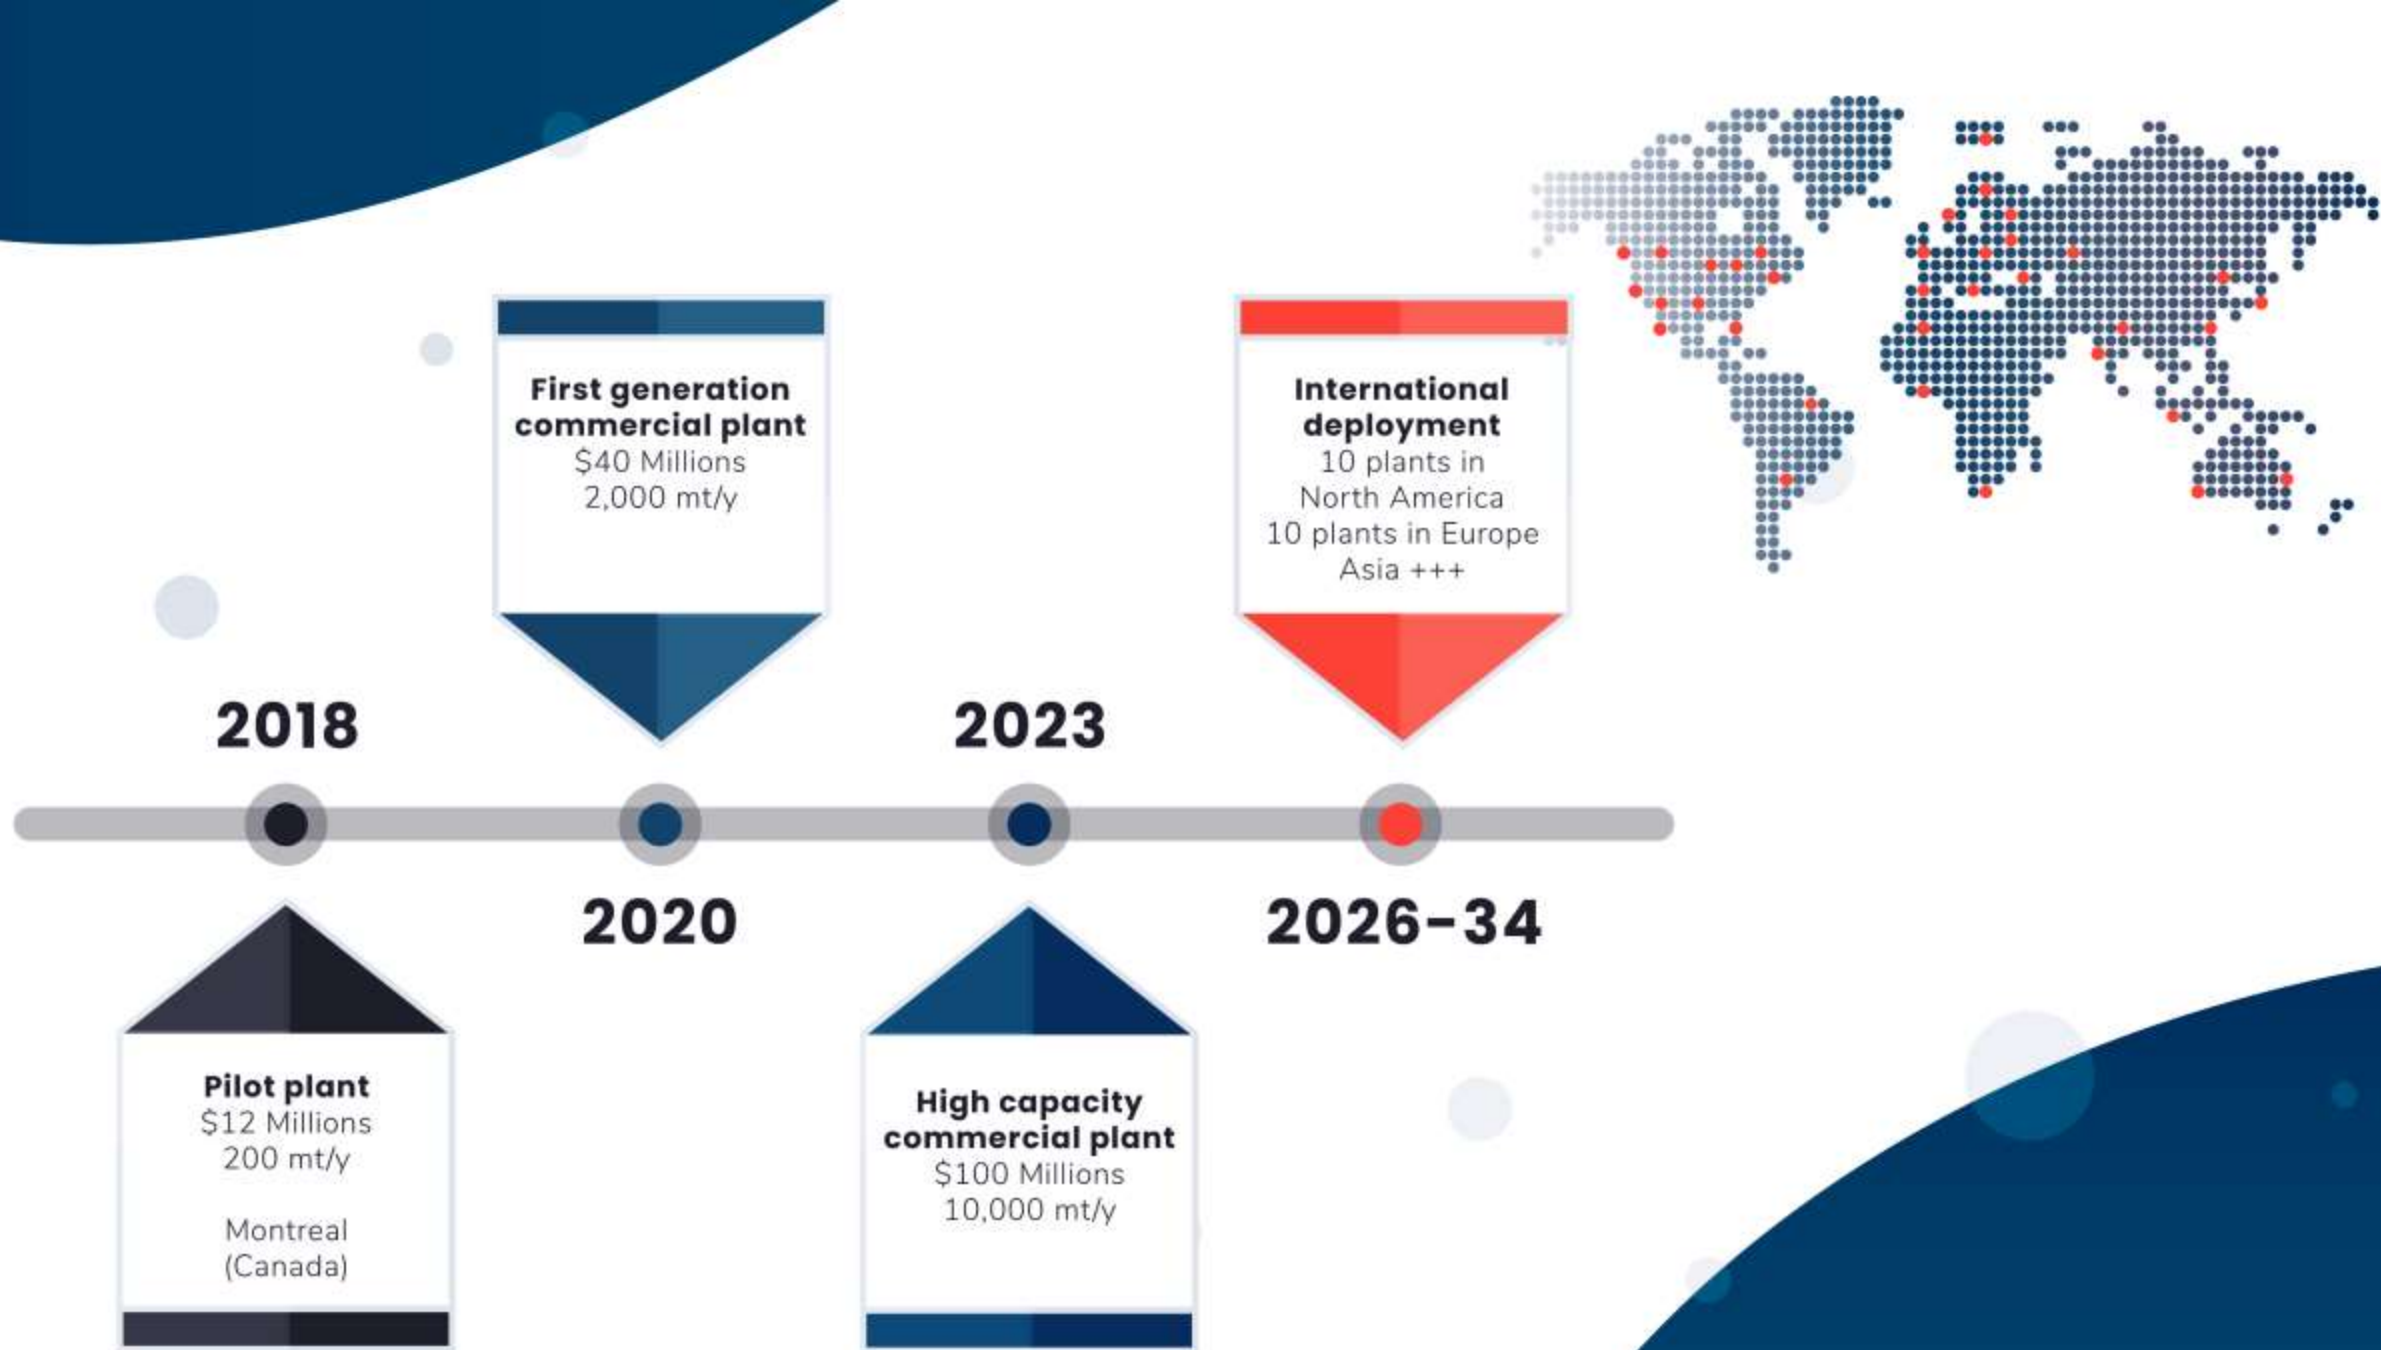

3

Generates high value battery grade materials;

6

Low GHG emissions

* Based on a mixed battery chemistry input representing the predicted market shares

Redefine the LIBs recycling industry

Lithion
Lithium-ion battery recycling
