BATTERY RESOURCES

End-of-Life Solutions to Performance Materials

NaatBatt Update February 2020

Joe Bush, PhD. - VP Business Development
Battery Resourcers:
• 100% Reuse Rate
• Engineered Product
• Direct to Battery
• Reduced OPEX
• Lower Cost
• Lower GHG Emissions
Our Approach

100% Reuse Rate

- Shredding
- Dissolve
- New Active Materials
- Li-ion Batteries
- Mechanical Separation
Value Proposition

Starting with the end in mind:

Sustainable End-of-Life Solutions

Secure Supply Chain for Critical Energy Materials

Lowest Cost to Produce Cathode

Highest Revenue Generation per Ton Recycled
PILOT
Recycling 500kg/day

Accepting Requests for qualification trials:
NMC 622
- $d(50)$: 10-12μm
- $d(50)$: 5-6μm

NMC PLANT – 1kt/yr (21Q2) to >5kT (2024)
