

BATTERY COLLECTION & RECYCLING: AN UPDATE

February 11, 2020
PRESENTED BY: Eric Dennis

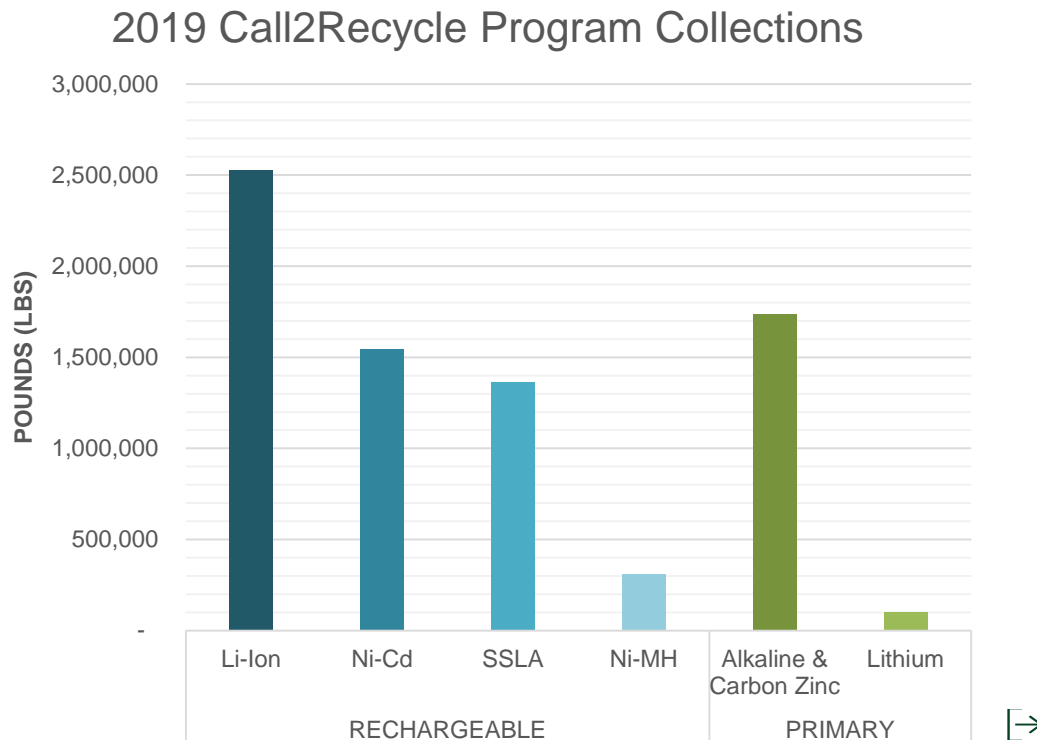

Program Overview

- Founded in 1994 by industry to address the emergence of mandatory recycling requirements.
- In the U.S., funded primarily by rechargeable battery stewards and, more recently, via fee-based services (DDR, alkaline, return services).
- In the U.S., we're primarily a voluntary program except in certain states (VT, MN, NY, etc.) where collections of some (but not always all) chemistries is mandated.
- Manage an established network of more than 16,000 collection sites; 86% of US residents have access to a collection site within 10 miles of their home

By The Numbers: 2019 Collections

- Since 1994, 123 Million pounds of batteries recycled in the U.S.
- More than 7.5 million pounds of batteries collected & recycled in 2019; 5% increase over 2018
- Rechargeable batteries á 13%
- Lithium Ion á 36%
- Retail sites: 3.3 million lbs. (7% increase from 2018);
Municipalities: 1.7 million lbs (18% increase from 2018)

Expanded Services & Solutions

COLLECTING & RECYCLING

STEWARDSHIP SERVICES

LARGE FORMAT BATTERIES (DATA CENTERS & BACK-UPS)

PRODUCT & BATTERY RETURN MANAGEMENT

BATTERY PROTECTION & FIRE SUPPRESSION

call2recycle
Leading the charge for recycling

Damaged, Defective or
Recalled (DDR) Lithium
Battery Kits

Fire Suppression Pillows

Storage & Transportation

CellBlock
Fire Containment Systems

Fire/Heat/Smoke
Suppressant

Fire Shield Blankets

Battery Safety Kits

Leading the charge for recycling.™

thank you!
